Subject: RE: How many RCRA sites in Region 6?
Date: Monday, June 24, 2013 10:04:00 AM

Hey John,
For Region 6,
145 RCRA TSDFs with CA needed or ongoing
453 RCRA Facilities TSDFs or Generators with CA needed or ongoing
900 RCRA Facilities TSDFs or Generators, etc. that have CA ongoing or completed.
Hope that helps..
Rick

A TSDF (Treatment, Storage, and Disposal Facility) is a facility that is permitted to treat, store, and/or dispose of hazardous waste in special units. These units are commonly called hazardous waste management units. A facility may be permitted to accept hazardous wastes for treatment, storage, and/or disposal from outside generators (a commercial TSDF) or be permitted to treat, store, or dispose of its own hazardous waste (a private TSDF).

I wanted to compare/contrast number of SF sites vs. RCRA sites in discussion at Frisco. Just a ballpark number would help.
